Wireless Hearing Transmitter **GENIESORI3 (GLE)**

Hear the difference with next-generation LE Audio

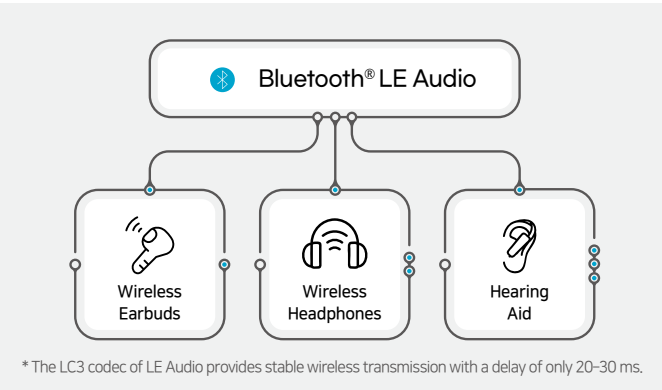

UWICOM

Your Wish is My Command

We are committed to continuous innovation that helps break down communication barriers for the elderly and individuals with hearing loss. Driven by our mission to enhance communication and our vision to improve quality of life, we created **GENIESORI**, our dedicated brand of assistive hearing solutions.

Next-Generation Bluetooth Technology: LE Audio

- GENIIESORI3 uses the LC3 codec of LE Audio, delivering high-quality sound with low latency and low power consumption.
- Compatible with a wide range of wireless earbuds, headphones, and hearing aids that support LE Audio, allowing users to hear sound clearly and wirelessly.
- Auracast™ support enables the same audio to be shared across multiple devices simultaneously.

26-Channel Auto-Fitting Algorithm

- Equipped with a **26-channel Auto-Fitting algorithm** developed by audio engineering specialists, the device precisely amplifies and adjusts incoming sound through its built-in microphone to deliver accurate and optimized audio.

External Audio Input Support

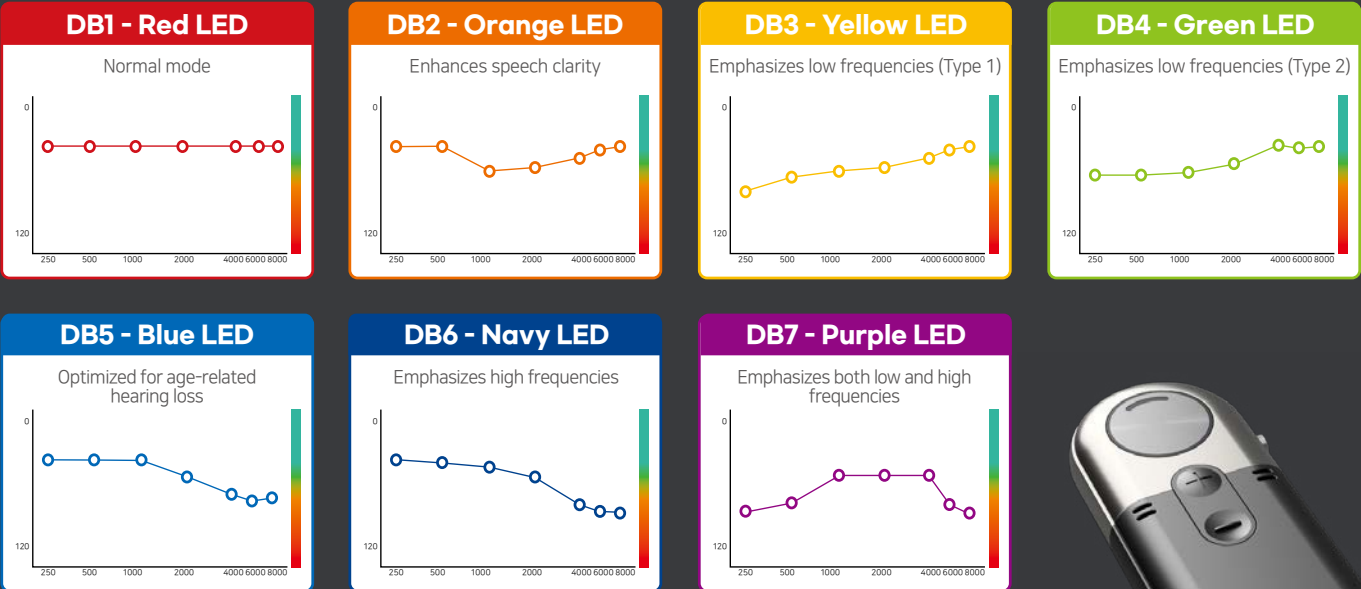

- The device supports **both built-in microphone input and USB audio input**, making it easy to connect with TVs, smartphones, and other external media sources.

Wide Audible Frequency Range: 20Hz - 20kHz

- Compared to conventional products, GENIIESORI3 supports a wider frequency range of 20Hz to 20kHz, allowing users to experience more natural and detailed sound across the full audible spectrum.

Seven Hearing Modes Supporting Different Types of Hearing Loss

Try different modes and choose the one that provides the most comfortable sound based on your hearing needs.

Product SPEC

Product	GENIIESORI3® (GLE)
Dimensions	W 28.2 × H 82 × T 12.2 mm
Weigh	27g
Bluetooth Version	5.3 LE Audio
Supported Frequency Range	20~20,000Hz
Battery Capacity	3.7V 550mAh
KC Certification Number	R-R-58W-GLE

! This product is exclusively compatible with Bluetooth LE Audio. Please ensure your earbuds or headphones support LE Audio before use.
